

CALFOMYTH

FLOWERING AND FRUIT SET IMPROVEMENT

CALFOMYTH is a mineral fluid fertilizer formulated to guarantee the full availability of phosphorus and calcium in the stages with high request of these nutritional elements particularly from the pre-flowering and to the fruits formation.

The specific form of phosphorus used in the **CALFOMYTH** formulation and the addition of calcium grant the availability of both of these elements in any conditions. The presence of boron and molybdenum in the formulation it is important to obtain an optimal flowering and fruit set of both the fruits trees and the vegetables.
